PROFESSIONAL-GRADE TRADING SYSTEM

CSI Pro Quick Start Installation Guide

TradingView | TradeStation | MetaTrader 5

Welcome to CSI Pro - Confluence Signal Intelligence. You now have access to a professional-grade trading system built on advanced multi-factor analysis. This guide covers installation for all three supported platforms.

Installation is quick and easy — most users complete setup in under 5 minutes. Just find your platform section below and follow the steps. If anything is unclear, our AI assistant can walk you through it.

New to your platform? If you're unfamiliar with adding indicators or navigating charts, refer to your platform's documentation for guidance (TradingView, TradeStation, or MT5 each have help centers), then return here.

⚠️ **Your First Stop for Help: 24/7 AI Assistant**

Before emailing support, try our instant AI chatbot - it can answer most questions immediately!

- **Visit now:** <https://frontieralgo.com/csi/support.html>
- Get **instant answers** to installation questions, indicator settings, and signal interpretation
- The AI assistant walks you through each step in real-time
- Available 24/7 - no waiting for email responses
- Ask anything - from basic setup to advanced trading questions

This guide covers all three platforms comprehensively, but you only need to read your platform section. The AI assistant can clarify anything that seems unclear.

Support Resources

AI Chatbot (Recommended First): <https://frontieralgo.com/csi/support.html> - Instant answers 24/7

Email support: support@frontieralgo.com (response within 24 hours)

1

TRADINGVIEW

How TradingView Access Works

CSI Pro indicators on TradingView are "invite-only scripts." This means we manually grant your TradingView account access to view and use them. **You**

must submit your TradingView username through our unlock page for this to happen.

Before You Start: Verify Your Access Was Requested

After your purchase, you should have been redirected to our unlock page to submit your TradingView username.

Did you complete the username submission form?

- **YES, I submitted my username:** Access is typically granted within 24 hours. Continue to "Step 1" below.
- **NO, I didn't see a form / I'm not sure:** Go to https://frontieralgo.com/csi/unlock_code.html NOW and submit your TradingView username.

How to Find Your TradingView Username

Your username is **NOT your email address**. Here's how to find it:

1. Log in to **TradingView.com**
2. Click your **profile icon** in the top right corner of the page
3. Your username is displayed at the **top of the dropdown menu**
4. It typically looks like: `@YourUsername` (without the @ symbol when submitting)

Your username can also be found in your profile URL:

`tradingview.com/u/YourUsername`

1 Check If You Have Access

Before proceeding with installation, verify your access has been granted:

1. Log into **TradingView.com**
2. Open any chart (the symbol doesn't matter)
3. Click the "**Indicators**" button at the top of your chart, OR press the  key
4. In the left sidebar of the Indicators window, look for the "**Invite-only scripts**" tab
5. Click on that tab

If You See CSI Indicators Listed:

- You should see "**Confluence Regime Intelligence PRO+ [CRI-Pro]**" and "**CRI-Pro+ Confluence Pane [CEI+CRG]**"
- **You have access!** Continue to Step 2 to add them to your chart

If the Tab is Empty or CSI is Not Listed:

Your access hasn't been granted yet. See the "What If You Don't Have Access?" section below.

2 Add Both Indicators to Your Chart

Once you can see the indicators in your Invite-only scripts tab:

Indicator Name	What It Does
Confluence Regime Intelligence PRO+ [CRI-Pro]	Main chart overlay - signals, trends, dashboard
CRI-Pro+ Confluence Pane [CEI+CRG]	Oscillator panel - CEI and CRG gauges

Click each indicator name once to add it to your chart. Both indicators will load automatically.

3 Verify Installation

✓ Installation Confirmed - Verify These Elements:

- **Main chart:** CSI-Pro+ displaying signal arrows and information dashboard
- **Lower pane:** Confluence Pane showing CEI and PRG oscillators

+ Customize Settings (Optional)

To adjust parameters, click the **gear icon** next to the indicator name in the chart legend.

Note: CSI Pro works with FREE TradingView accounts. No paid TradingView subscription is required.

TradingView Troubleshooting

"I don't see the Invite-only scripts tab at all"

The tab only appears if you have at least one invite-only indicator. If you've never had access to any invite-only scripts before:

1. Confirm you submitted your username at https://frontieralgo.com/csi/unlock_code.html
 2. Wait up to 24 hours for access to be granted
 3. After 24 hours, try logging out of TradingView and back in
 4. Clear your browser cache if the tab still doesn't appear
-

"I see the Invite-only scripts tab, but CSI Pro isn't listed"

This means your access hasn't been granted yet, or there may be a username mismatch.

1. **Less than 24 hours since purchase?** Wait - access is granted manually during business hours
 2. **More than 24 hours?** Double-check that you submitted your username correctly at https://frontieralgo.com/csi/unlock_code.html
 3. **Still no access?** Email support@frontieralgo.com with:
 - Your exact TradingView username
 - Your order confirmation or receipt
 - The email address used for purchase
-

"The indicator loads but shows no signals"

- Make sure your chart has at least 200 bars of data loaded
 - Try a larger timeframe (like 1-hour or daily) to confirm it's working
 - Some symbols with limited data may not display properly
 - Scroll to the current bar - the dashboard appears near recent price action
-

"I have a free TradingView account - will this work?"

Yes! CSI Pro is fully compatible with free TradingView accounts. No paid TradingView subscription is required.

2

TRADESTATION

How TradeStation Access Works

TradeStation indicators are delivered as an ELD file customized with your Customer Number. After you submit your Customer Number through our unlock page, we generate and email your personalized indicator file.

Before You Start: Verify You Have Your ELD File

You should have received an email with your personalized **CSI_CONFLUENCE_SIGNAL_INTELLIGENCE.ELD** file attached.

- **YES, I have the ELD file:** Continue to the installation steps below.
- **NO, I haven't received the email:** Check your spam/junk folder. If still not there, go to https://frontieralgo.com/csi/unlock_code.html and submit your TradeStation Customer Number.

How to Find Your TradeStation Customer Number

Your Customer Number is required to generate your personalized indicator file. Here's how to find it:

1. Open **TradeStation**
2. Click **Help** in the top menu
3. Click **About TradeStation**
4. Your **Customer Number** is displayed in that window

The Customer Number is a numeric code that uniquely identifies your TradeStation account.

Your Personalized Package Contains:

- **CSI_Pro_ShowMe** - Main chart overlay with signals
- **CSI_Pro_PRG** - Probability Reversal Gauge
- **CSI_Pro_CEI** - Cycle Exhaustion Index

Quick Install: Double-Click Method

Recommended approach:

1. Locate `CSI_CONFLUENCE_SIGNAL_INTELLIGENCE.ELD` in your Downloads folder (from the email)
2. **Double-click the file**

TradeStation will launch automatically and open the Import Wizard.

1 The Import Wizard Opens

After double-clicking, the EasyLanguage Import Wizard will appear.

Click **Next** to continue.

2 Verify All Components Are Selected

You should see checkboxes for three items:

- CSI_Pro_ShowMe
- CSI_Pro_PRG
- CSI_Pro_CEI

Make sure all three are checked, then click **Next**.

3 Handle Any Replacement Prompts

If you've installed a previous version, TradeStation will ask if you want to replace it.

Click **Yes to All** to update to the latest version.

4

Complete the Installation

Click **Finish**.

TradeStation will automatically compile the indicators.

Installation Complete

- Indicators are now installed and ready for use

?

Alternative Method: Manual Import

If double-clicking doesn't launch the wizard, follow these steps:

1. Open **TradeStation**
2. Go to **File > Import/Export EasyLanguage**
3. Select **Import EasyLanguage (ELD, ELS or ELA)**
4. Click **Browse** and navigate to your
CSI_CONFLUENCE_SIGNAL_INTELLIGENCE.ELD file
5. Click **Open**, then **Next**
6. Verify all three components are checked
7. Click **Next**, then **Finish**

5 Verify Installation

To confirm everything installed correctly:

1. Go to **View > EasyLanguage Documents**
2. Look under **ShowMe Studies** - you should see **CSI_Pro_ShowMe**
3. Look under **Indicators** - you should see **CSI_Pro_PRG** and **CSI_Pro_CEI**

+ Workspace Installation (If Included)

If you received a workspace file (.tsw):

1. Complete the ELD installation first
2. Double-click the `.tsw file`
3. TradeStation will open with pre-configured charts

TradeStation Troubleshooting

"I never received my ELD file email"

1. **Check spam/junk folder** - emails from frontieralgo.com sometimes get filtered
 2. **Wait up to 24 hours** - files are generated and sent manually during business hours
 3. **Submit your Customer Number** at https://frontieralgo.com/csi/unlock_code.html if you haven't already
 4. **Contact support** at support@frontieralgo.com with your Customer Number and order confirmation
-

"Analysis technique not found" error when opening workspace

This means the workspace is trying to use indicators that aren't installed yet.

Solution: Install the ELD file FIRST, then open the workspace file.

"Double-clicking the ELD file does nothing"

1. Make sure TradeStation is installed and working
 2. Try the Manual Import method described above
 3. Right-click the ELD file > Open With > TradeStation
-

"Components don't appear in EasyLanguage Documents"

1. Re-import the ELD file using the manual method
2. When prompted about existing versions, click **Replace** or **Yes to All**
3. Restart TradeStation after import

Next Steps

Review the **CSI_PRO_COMPLETE_MANUAL_TradeStation_Version.pdf** for complete documentation on signals, settings, and trading strategies.

3 METATRADER 5

How MetaTrader 5 Access Works

MT5 indicators are delivered as compiled .ex5 files customized for your MT5 account. After you submit your MT5 Account Number through our unlock page, we generate and email your personalized indicator files.

Before You Start: Verify You Have Your Indicator Files

You should have received an email with your indicator files (.ex5 files) attached or as a download link.

- **YES, I have the .ex5 files:** Continue to the installation steps below.
- **NO, I haven't received the email:** Check your spam/junk folder. If still not there, go to https://frontieralgo.com/csi/unlock_code.html and submit your MT5 Account Number.

How to Find Your MT5 Account Number

Your MT5 Account Number (also called Login number) is required to generate your personalized indicator files. Here's how to find it:

1. Open **MetaTrader 5**
2. Look at the **Navigator** panel on the left side (press Ctrl+N if not visible)
3. Expand **Accounts** - your account number is shown next to your broker name
4. Alternatively: Click **File > Login to Trade Account** - the number in the "Login" field is your account number

Your account number is typically a 6-10 digit number.

Included Files

Your package contains three indicator files:

File	Purpose
CSI_Pro.ex5	Main signal generator with on-chart dashboard
CSI_Pro_PRG.ex5	Probability Reversal Gauge oscillator
CSI_Pro_CEI.ex5	Cycle Exhaustion Index oscillator

1 Open Your Data Folder

1. Launch **MetaTrader 5**
2. Click **File** in the top menu
3. Click **Open Data Folder**

A Windows Explorer window will open showing your MT5 data location.

2 Navigate to the Indicators Folder

In the folder that opened:

1. Double-click `MQL5`
2. Double-click `Indicators`

You are now in the correct folder for custom indicators.

3 Copy Your Indicator Files

1. Locate the three `.ex5 files` you received (check your Downloads folder or extract from ZIP)
2. Copy all three files
3. Paste them into the **Indicators** folder you just opened

4 Refresh MetaTrader

Back in MetaTrader 5:

1. Press `Ctrl+N` to open the Navigator panel (or click View > Navigator)
2. Find **Indicators** in the Navigator tree
3. **Right-click** on Indicators
4. Click **Refresh**

Your indicators will now appear in the list.

5 Add Indicators to Your Chart

In the Navigator panel, locate the CSI indicators and **double-click each one** to apply to your chart.

Recommended Setup:

Location	Indicator	What You'll See
Main Chart	CSI_Pro	Signal arrows, trend lines, dashboard
Subwindow 1	CSI_Pro_CEI	Cycle exhaustion analysis
Subwindow 2	CSI_Pro_PRG	Probability reversal gauge

6

Verify Installation

Check the Experts tab at the bottom of MT5. Confirmation messages indicate each indicator loaded successfully.

Installation Confirmed - Verify These Elements:

- CSI Pro displayed in the chart title
- Dashboard panel showing trade information
- Subwindows displaying CEI and PRG oscillators

⚠️ MetaTrader 5 Troubleshooting

"I never received my indicator files email"

1. **Check spam/junk folder** - emails from frontieralgo.com sometimes get filtered
 2. **Wait up to 24 hours** - files are generated and sent manually during business hours
 3. **Submit your MT5 Account Number** at https://frontieralgo.com/csi/unlock_code.html if you haven't already
 4. **Contact support** at support@frontieralgo.com with your Account Number and order confirmation
-

"The indicators don't appear in Navigator after refresh"

1. **Verify file location:** The .ex5 files must be directly in MQL5/Indicators (not in a subfolder)
 2. **Check file extension:** Make sure files are .ex5, not .ex5.txt or similar
 3. **Restart MT5:** Sometimes a full restart is needed for new indicators
-

"I get a DLL error or the indicator won't load"

1. Open **Tools > Options > Expert Advisors** tab
 2. Make sure **"Allow DLL imports"** is checked
 3. Click OK and try adding the indicator again
-

"The dashboard isn't visible on my chart"

1. Open indicator settings (right-click indicator name > Properties)
 2. Find **"Show Dashboard"** and ensure it's set to **true**
 3. Scroll your chart to the rightmost bar - the dashboard appears in the visible area
 4. Try maximizing your chart window
-

"Indicators load but show no signals"

1. Ensure you have sufficient historical data loaded

2. Try a more liquid symbol like EURUSD or US30
3. Check that "Allow DLL imports" is enabled if prompted

Next Steps

Review the **CSI_PRO_COMPLETE_MANUAL_MetaTrader5_Version.pdf** for complete documentation on signals, settings, and trading strategies.

General Troubleshooting

Quick Fixes for Common Issues

If This Happens...	Try This First
Access not granted (TradingView)	Submit username at frontieralgo.com/csi/unlock_code.html
Never received files (TradeStation/MT5)	Check spam folder; submit account number at unlock page
Indicators not showing signals	Load more historical data on your chart
Dashboard or panel not visible	Scroll chart to current bar; check display settings

If This Happens...**Try This First**

Installation seems stuck

Restart your trading platform completely

File won't open or import

Re-download the file; check for antivirus blocking

 **Access Delivery Timeline**

Platform	How Access is Delivered	Typical Timeline
TradingView	We manually add your username to our invite-only scripts	Within 24 hours
TradeStation	Personalized ELD file emailed to you	Within 24 hours
MetaTrader 5	Personalized .ex5 files emailed to you	Within 24 hours

Important: Access is granted manually during business hours. If you purchased on a weekend or holiday, your access may arrive the next business day.

Still Having Issues?

Start with our AI chatbot: <https://frontieralgo.com/csi/support.html>

The AI assistant resolves most questions instantly and is available 24/7.

Email: support@frontieralgo.com

When contacting email support, please include:

- Your platform (TradingView, TradeStation, or MT5)
- Your username or account number
- Your order confirmation or receipt
- A description of the issue

Installation Complete

CSI - Confluence Signal Intelligence is now ready for use.

Explore the indicator settings and review the complete manual for your platform to maximize the system's capabilities.
